An enthusiastic and motivated young individual with a lifelong passion for computing, technology and gaming who is currently searching for an apprenticeship in software and website development. I have experience working in a team during my time at college creating a website designed per a customer's requirements, as well as taking a leadership role in developing a computer game within a small group and I can work and learn effectively on my own initiative.

SKILLS

Proficient	Elixir, Phoenix, JavaScript, React, Git, TDD, HTML, CSS, JIRA
