SKILLS

PROFICIENT	Elixir, Phoenix, JavaScript, React, Git, TDD, HTML, CSS, SASS, JIRA
INTERMEDIATE	MongoDB, TypeScript, Express, PostgreSQL, Redis, Docker, Unix, LaTeX
BEGINNER	Erlang, Kotlin, Linux, MySQL, AWS

WORK EXPERIENCE

Current
NOV 2018

Apprentice Back-End Developer at SQUARE ENIX, London

Rebuilt an Express application Back-End in Phoenix improving its functionality and fault tolerance. Developed a Full-Stack application in Phoenix for allowing external Influencers to submit their data to SQUARE ENIX for improved contact, upholding strict user PII safety. Assisted with the development of a TypeScript-Express-MongoDB CMS Back-End and a set of Cowboy public APIs in Elixir. All while contributing to the maintenance of the login authentication system Membership, tackling much legacy code following the rewrite from Ruby to Elixir and the on-going implementation of the Event Sourcing pattern.

APR 2018

Apprentice Front-End Developer at SQUARE ENIX, London

I assisted in maintaining React and Express based webapps such as Just Cause and Tomb Raider implementing bug fixes, assisting with migration from SASS to Styled Components as well as building a Full-Stack Express application for our QA team which provides a view of how our internal environments look when shared on social media platforms.

EDUCATION

2018 - 2019

Level 4 Software Development Apprenticeship
CORNDEL SOFWARE ENGINEERING ACADEMY, London
Grade: -

APR 2018
